been visiting in the village.

As undue summer exposure usually leaves an undesirable surface of tan, redness or roughness, often freckles, too, the sensible thing to do is to remove such surface. There's nothing better for this than ordinary mercolized wax, which actually absorbs an unwholesome complexion. The thin layer of surface skin is itself absorbed, gently, gradually, so there's no inconconvenience, no detention indoors. Spread the wax lightly over the entire face at bedtime and take it off in the morning with warm water. If you will get one ounce of mercolized wax at the drug store, use it for a week or so, you may expect marked improvement daily. When the underlying skin is wholly in view your complexion will be a marvel of spotless purity and beautiful whiteness.

Don't let those summer wrinkles
